codec\_data

camera\_calibration\_data

FrameStruct

```
graph BT; FrameStruct[FrameStruct] -.->|codec_data| CodecParamsStruct[CodecParamsStruct]; FrameStruct -.->|camera_calibration_data| CameraCalibrationStruct[CameraCalibrationStruct];
```

The diagram illustrates a data flow from a central 'FrameStruct' box to two other boxes, 'CodecParamsStruct' and 'CameraCalibrationStruct'. 'FrameStruct' is a grey box at the bottom, while the other two are white boxes at the top. Dashed purple arrows point from 'FrameStruct' to each of the top boxes. The arrow to 'CodecParamsStruct' is labeled 'codec\_data', and the arrow to 'CameraCalibrationStruct' is labeled 'camera\_calibration\_data'.
